Oregon NPS plan final comments jc\_mj.docx

.....  
Hey Martha,

I had a few minor edits. Otherwise looks good.

Marty

Hi Martha,

Both documents look great. I included a few comments –see attached. Are you having Marty review these documents to make sure his comments were included accurately?

I don't know where to include the following comment which is required via 319 guidance but not included under the components:

Need to include new information required to be in the TMDL documents (“...as a condition of

using § 319 funds to develop TMDLs, the state will include the following supplemental information to support the load allocations specified in the TMDL: (1) an identification of total NPS existing loads and total NPS load reductions necessary to meet water quality standards, by source type; (2) a detailed identification of the causes and sources of NPS pollution by source type to be addressed in order to achieve the load reductions specified in the TMDL (e.g., acres of various row crops, number and size of animal feedlots, acres and density of residential areas); and (3) an analysis of the NPS management measures by source type expected to be implemented to achieve the necessary load reductions, with the recognition that adaptive management may be necessary during implementation.”)
